

Vermont Department of Financial Regulation Insurance Division

2014 Vermont Household Health Insurance Survey Research Findings

Brian Robertson, Ph.D.
Mark Noyes

Acknowledgements: *The Department of Financial Regulation, Insurance Division extends thanks to all the Vermonters who so generously gave their personal time to participate in this survey and represent their families, neighbors and communities. The Department would also like to thank the members of the Survey Planning Committee whose input was critical to the design of the survey.*

Presentation Contents

- **Survey Methodology**
- **Primary Type of Health Insurance Coverage**
- **The Uninsured**
 - **Eligibility for Expanded Medicaid or Coverage through the Exchange**
 - **Access to ESI Among the Working Uninsured Aged 18 to 64**
- **Health Insurance Coverage**
- **Trends in Employer-sponsored Insurance**
- **The Underinsured**
- **Interruptions in Insurance Coverage**
- **Medical Expenses and Barriers to Care**

Survey Methodology

Sampling Approach

- **The 2014 Vermont Household Health Insurance Survey is based on telephone interviews conducted between August 13, 2014 and December 4, 2014 among 4,052 randomly selected households in Vermont.**
- **Data was gathered on a total of 8,923 Vermont residents, including 322 uninsured residents.**
- **To provide complete coverage, the sampling methodology also incorporated cell phones.**
- **41% of surveys were completed among residents by cell phone.**
- **To obtain better precision in estimates for rural areas, the sample was stratified into four regions based on geographically contiguous counties. The goal was to complete approximately 1,000 surveys in each of the four regions.**

Survey Response and Sampling Error

Sample Component	Response Rate	Refusal Rate
General Population (Landline)	44.9%	2.2%
General Population (Cell phone)	33.1%	1.2%

The percentages reported for the general population survey are within plus or minus 0.9% of what would be found if all households and residents in Vermont participated.

The percentages reported in the analysis of the uninsured population of Vermont are within plus or minus 0.5% if all uninsured residents participated.

Results of the 2014 Vermont Household Health Insurance Survey

The results presented in this report are based on self-reported information provided by Vermont residents during telephone interviews.

Primary Type of Health Insurance Coverage

Primary type of health insurance coverage classifies residents with more than one type of insurance into a single category based on a trumping hierarchy.

Over half of Vermonters (54.4%) have private insurance as their primary type of health care insurance.

Types of Insurance Coverage in Vermont (% of Vermont Residents)

Data Source: 2014 Vermont Household Health Insurance Survey

Note: Primary type of health insurance coverage classifies residents with more than one type of insurance into a single category based upon the following hierarchical order; Medicare (except in cases where resident was over 64 and covered by a private insurance policy through an employer with 25 or more employees or person was covered by military insurance), private insurance, military, state health insurance and uninsured. Included in the category of private health insurance coverage are those who purchased through Vermont Health Connect.

Trends in Primary Source of Health Insurance Coverage, 2000 - 2014

Data Sources: 2000, 2005, 2008, 2009, 2012 and 2014 Vermont Household Health Insurance Surveys

Note: Primary type of health insurance coverage classifies residents with more than one type of insurance into a single category based upon the following hierarchical order; Medicare (except in cases where resident was over 64 and covered by a private insurance policy through an employer with 25 or more employees or person was covered by military insurance), private insurance, military, state health insurance and uninsured. Included in the category of private health insurance coverage are those who purchased through Vermont Health Connect.

The Uninsured

In the 2014 Vermont Household Health Insurance Survey, a person with no health insurance coverage at the point-in-time the interview was conducted was categorized as uninsured.

The percentage of uninsured Vermont residents in 2014 has decreased compared to 2009 and 2012.

Data Source: 2000, 2005, 2008, 2009, 2012 and 2014 Vermont Household Health Insurance

Approximately 23,000 Vermont residents currently have no health insurance, a decrease of just under 20,000 since 2012.

- **Uninsured residents under age 18:**
 - 1,300 in 2014
 - 2,800 in 2012
 - 3,600 in 2009
 - 3,900 in 2008
 - 6,900 in 2005
 - 6,200 in 2000

- **Uninsured residents between the ages of 18 and 64:**
 - 21,600 in 2014
 - 39,700 in 2012
 - 43,800 in 2009
 - 43,300 in 2008
 - 54,000 in 2005
 - 44,000 in 2000

Though the rate of child poverty in Vermont has varied, the rate of children without insurance has fallen since 2005.

Data Source: 2005, 2008, 2009, 2012 and 2014 Vermont Household Health Insurance Surveys

A majority (55%) of children in Vermont are part of families earning less than 300% of FPL .

**Distribution of Children in Vermont by Income
(% of children)**

Among uninsured children, 46% live in families earning less than 300% of FPL.

More than one in ten (11%) adults aged 25 to 34 is uninsured.

Is person uninsured? - Age
(% Yes)

Source: 2014 Vermont Household Health Insurance Survey

Since 2012, the percentage of uninsured residents has declined among every age cohort.

Characteristics of the Uninsured

More than one quarter (29.9%) of the uninsured in Vermont reside in families whose income is beneath 139% of the FPL.

Distribution of Uninsured Vermont Residents by FPL (% uninsured)

Data Source: 2014 Vermont Household Health Insurance Survey

Uninsured Children

Approximately 1,300 Vermont children currently have no health insurance:

- Almost two-thirds (62.8%) are female
- The largest percentages live in Franklin, Caledonia, and Addison counties.
- About a quarter (26.7%) reside in families whose annual incomes are between 100% and 138% of FPL.
- Nearly half (45.6%) are part of families making less than 300% of FPL.

Uninsured Adults Aged 18-64

Approximately 21,600 Vermont adults aged 18 to 64 currently have no health insurance:

- Two-thirds (67.0%) are male.
- Half (50.2%) of the uninsured adult population is aged 18 to 34.
- Just under half (45.9%) of uninsured adults reside in families with incomes below 200% of FPL and one in three (30.2%) reside in families below 139% of FPL.
- More than three-quarters (79.4%) of uninsured adults are employed and more than seven in ten (76.1%) of those adults work full time.

Eligibility for Expanded Medicaid or Coverage through the Exchange

Under the guidelines in the Patient Protection and Affordable Care Act (PPACA), uninsured residents may be eligible for coverage under state health insurance programs or eligible for some level of premium assistance (tax credits) to assist in purchasing health insurance through the Health Exchange.

Eligibility Criteria

- **State Health Insurance Coverage:**
 - PPACA guidelines expand Medicaid coverage for most adults up to an income of 138% of federal poverty level (with income offsets).
 - In Vermont, children (aged 0 to 18) are eligible for Medicaid or Dr. Dynasaur if their family's income is 317% of FPL or less (with income offsets).

Eligibility Criteria

- **Premium Subsidies (Tax Credits) for Insurance Offered through the Exchange:**
 - The PPACA provides tax credits that reduce premium costs.
 - Subsidies are provided for families with incomes up to 400% of FPL.
 - The tax credits are designed such that an individual of a family will not spend more than a specific percentage of their income on health insurance premiums.
 - Plans offered through the Exchange also cap out-of-pocket expenses based on family income.

Among uninsured children age 0 to 18, more than half (52%) are eligible for Medicaid/Dr. Dynasaur. One in six (15%) reside in families that would be eligible for subsidies to purchase insurance through the Exchange.

**Eligibility for State Health Insurance or to Purchase Health Insurance through the Exchange
(% among Uninsured Children 0 – 18)**

The Underinsured

- Residents with private health insurance under age 65 were classified as underinsured based on the formula developed by the Commonwealth Fund.

- **A resident with is defined as underinsured if:**
 - The deductible for the private health insurance coverage exceeds 5% of a family's income and/or

 - A family earned 200% or less of federal poverty level and their out of pocket expenses for medical care exceeds 5% of family income.

 - A family more than 200% of federal poverty level and their out of pocket expenses for medical care exceeds 10% of family income.

The Underinsured Among those Under Age 65 with Private Health Insurance

Nearly three in ten (27%) privately insured residents under age 65 are underinsured.

Is person on private health insurance underinsured?
(% yes among those under age 65)

Source: 2014 Vermont Household Health Insurance Survey

More than six in ten (63%) of those aged 18-24 with private health insurance are underinsured.

Is person on private health insurance underinsured
(% yes among those under age 65 by Age)

In 2014, more than half (61.5%) of Vermont residents aged 18 to 24 are underinsured.

Source: 2014 Vermont Household Health Insurance Survey

Reasons for Being Underinsured

- **The following slides provide the percentage of residents that are classified as underinsured due to:**
 - Their out of pocket medical expenses (exceeding 10% of their income or 5% of their income if below 200% of FPL)
 - Their private health insurance deductible (greater than 5% of their income)
 - For both of these reasons
- Results are provided by age and income.

Individuals of all ages are more likely to be underinsured due to expenses than deductibles. Those aged 18 to 24 are most likely (35.8%) to be underinsured due to expenses.

Rate of Underinsured due to Out-of-Pocket Medical Expenses Only by Age
(% among those with insurance)

Source: 2014 Vermont Household Health Insurance Survey

Those 65 and older are least likely (0.7%) to be underinsured due to deductible costs.

Source: 2014 Vermont Household Health Insurance Survey

18 to 24 year olds are the most likely (23.4%) to be uninsured due to both expenses and deductibles.

**Rate of Underinsured due to both Private Health Insurance Deductible and Out-of-Pocket Medical Expenses by Age
(% among those with insurance)**

Those with incomes beneath 200% FPL are more likely to be underinsured due to expenses.

Rate of Underinsured due to Out-of-Pocket Medical Expenses Only
by Income - FPL
(% among those with insurance)

Interruptions in Insurance Coverage

In the 2014 Vermont Household Health Insurance Survey, insured respondents were asked several questions regarding whether they had an interruption in insurance coverage within the last 12 months and their concern about losing their health insurance in the future.

Approximately 29,000 currently insured Vermont residents (4.8%) had been without health insurance coverage at some time during the previous 12 months. This is a slight increase from 2012.

**Has person been without coverage anytime in the last 12 months?
(% among insured 2000-2014)**

Data Source: 2000, 2005, 2008, 2009, 2012 and 2014 Vermont Household Health Insurance Survey

More than half (57.7%) of those who experienced an interruption in coverage were without coverage for 1 to 3 months.

Approximately how many of the past 12 months was person WITHOUT health insurance coverage?

58.2% have been covered under their current health insurance for 6 months or less while 38.8% have been covered for more than 6 months.

Data Source: 2014 Vermont Household Health Insurance Survey

Approximately 52,800, or 8.8% of currently insured Vermont residents are concerned they may lose their health insurance during the next 12 months, trending down since 2009.

**Are you concerned that Person may lose health insurance coverage within the next 12 months?
(% among those with health insurance)**

Data Source: 2014 Vermont Household Health Insurance Survey

Those with coverage through Medicaid or VT Health Connect are most likely to be concerned about losing coverage within the next 12 months.

Are you concerned that person may lose health insurance coverage within the next 12 months?
(% by primary type of insurance)

Data Source: 2014 Vermont Household Health Insurance Survey

Vermonters age 65 and older are less likely to be concerned about losing their health insurance (5.0%) than other Vermonters.

**Are you concerned that person may lose health insurance coverage within the next 12 months?
(% by age category)**

Data Source: 2014 Vermont Household Health Insurance Survey

Those enrolled in state health insurance (Medicaid or Dr. Dynasaur) are more often concerned about a loss of insurance due to eligibility rules and life status changes.

Why is person concerned that he or she may lose their health insurance coverage during the next 12 months?

(Reasons among those that are concerned about loss or coverage)

	Rate		Count	
	Overall	Medicaid, Dr. Dynasaur	Overall	Medicaid, Dr. Dynasaur

Mental Health Care Access

One in ten (10.0%) residents received mental health care or counseling with the past 12 months with the largest percentage (14.3%) among those aged 35-44.

**During the past 12 months did person receive mental health care?
(% yes)**

Data Source: 2014 Vermont Household Health Insurance Surveys

Those earning less than 139% of FPL are most likely (14.6%) to have received mental health care during the past 12 months.

**During the past 12 months did person receive mental health care?
(% yes)**

Data Source: 2014 Vermont Household Health Insurance Surveys

Across all age groups less than 3% report being unable to receive necessary mental health care due to affordability.

**Was there any time person needed mental health care or counseling but did not get it because they could not afford it?
(% yes)**

Data Source: 2014 Vermont Household Health Insurance Survey

Fewer than 3% of Vermont residents at any income level find mental health care inaccessible due to affordability.

Was there any time person needed mental health care or counseling but did not get it because they could not afford it?
(% yes by income - FPL)

Data Source: 2014 Vermont Household Health Insurance Survey

5.3% of residents did not get needed care due to a lack of a provider. Mental health care and counseling is the type of care Vermonters are most likely to delay or not receive because providers are unavailable.

**Was there any time person delayed or did not get care because a health care provider was not available? What type of care?
(% among those not getting needed care)**

Data Source: 2014 Vermont Household Health Insurance Survey

Among the 5.9% of Vermonters that travel outside their area to receive care, mental health care was the fifth most common reason.

Has person had to travel outside your area to receive PHYSICAL OR MENTAL health care because you could not find a provider? What type of care?

(% among those having to travel outside their area to receive care)
